

# GET OUT OF THE BOX!

## 10 Reasons Why BOXI is Not Enough for your CA® Environment.

### 1. A UNIFIED VIEW OF ALL YOUR CA® SOLUTIONS

Want BOXI for more than just CA® Service Desk? You're in luck because Yurbi works with ITCM, NSM, Asset Portfolio Management, Clarity, and more CA® solutions on the way!

### 2. YOU NEED A SOLUTION WITH GUTS

Yurbi is designed to let users analyze 100's of THOUSANDS of data elements, securely, and 100% from the web. How do we do it? A powerful reporting engine and a robust interface designed using Microsoft® Silverlight technology.

### 3. ONE SOLUTION FOR ALL OF YOUR CROSS-VENDOR PRODUCTS

Odds are your company leverages a lot of great technology, no just CA®. If you wanted BOXI to work with any of your non-CA® solutions, you would need to devote significant resources in an attempt to, "build-out the Universe."

Or, for typically less the costs of BOXI training, you can give Yurbi to your users for instant success. Yurbi provides out-of-the-box analytics for vendors such as CA®, HP®, BMC®, RIM®, Lumeta®, LanDESK®, and more!

### 4. YOUR BUDGET HAS BEEN SLICED AND DICED

Let's be sure this message is clear, for the costs of BOXI training and a few weeks of a specialized BOXI reporting developer, you could purchase Yurbi and have your reports created and deployed.

### 5. STOP BUYING EXTRA CA® LICENSES

BOXI uses the CA® Service Desk security roles, which in turn require ANALYST access. For the cost of buying additional Analyst licenses, you could purchase Yurbi and extend CA® analytics to more people in your organization.

### 6. NO NEED FOR EXTRA HARDWARE

Unlike BOXI, you can purchase Yurbi and install it on the same server as your CA® solutions, like Service Desk. For smaller environments, the cost of that new BOXI server and OS outweighs the cost of Yurbi altogether.

### 7. YOU NEED A TOOL THAT WAS INTENDED FOR HUMAN USE

Ease of use? Take this challenge: give one of your Service Desk business users access to BOXI and ask them to create a report.....then show them the same capability in Yurbi.

Regardless of the marketing pitch, Yurbi will allow your users to securely create reports and dashboards on their own. With BOXI by itself, be prepared to set aside a large training budget OR have your Administrator spending all their time writing reports.

### 8. ELIMINATE PAINFUL UPGRADES

You should have second thoughts about BOXI when even CA® warns you to be careful customizing your BOXI Universe. You're on dangerous ground with BOXI - one wrong move on the new CA® patch, and it's all gone.

With Yurbi, you never have to worry about a CA® patch disrupting your reports.

### 9. SUPPORT YOU CAN COUNT ON

We've tried to make Yurbi as simple as possible, but we also know that no solution is issue-free. Luckily, if you did have a problem, we have dedicated experts ready to help.

### 10. THE BEST IS YET TO COME

Our goal is to help people understand and do more with their data. We have several cool features to watch out for, like:

- **Automatic Alerts: when CA® Service Desk data thresholds are exceeded**
- **Integration with Cloud Services like Google Docs, Google Maps, and more**

And you won't have to wait too long for new features - we offer new releases every quarter, not every 18 months!
